

Technical mouldings

EXTERIOR ARCHITECTURAL PROFILES

Gone are the days of heavy concrete mouldings that crack and require drilling and the use of screws and plugs.

Using the latest technology, we are able to give you any shape, size and design you require, these are easily glued on.

Our unique coating process and products are of the highest standard; and above all we aim for on time delivery, giving you the peace of mind that your project will be on schedule.

Here are some of the reasons why Technical Mouldings are in a class of their own.

Advantages

- * Competitively priced
- * Light weight
- * No mechanical fixing
- * Straight lines
- * Will not crack
- * Uniform sand finish
- * Will not delaminate
- * No etch primer required
- * Sharper design

Benefits to you

- * Pay less to get more
- * One man operation
- * Labour Cost Down
- * No more bowing
- * No return visits
- * Matches render
- * Confidence in your work
- * Excellent surface for paint
- * No extra cost

For a free quote or if you just require advice on moulding designs, please call

PC – 006 Profile Style Pier Cap

Pier caps are made to suit your project pier size and dimensions.
They can be square or rectangular and peak height and pitch can be varied from 100mm to 200mm.

If you can't find what you like here try our onsite custom design service & sample matching
available through our versatile CNC equipment.

We carry 365mm x 365mm x 110mm and 480mm x 480mm x 110mm as standard sizes in stock.

Please note: For fence capping see our Fence Capping Profiles page.
